

In the time it takes
to read this notice,
you can help protect
your climate future.

Young people have been marginalized in the national conversation around climate change. But they have the most skin in the game—even as they did not cause the problem in the first place!

Join in a pioneering effort this spring to convey with captioned photos what your local area will look like in the coming decades. The flora? Fauna? Streets and structures? You choose.

EXCITING DETAILS

Home Stories is partnering with the nonprofits
It's Our Future and Seeing for Ourselves
on an initiative involving students
across the country!

Your work can be featured
in a gallery exhibit
and a documentary film targeted
for public television and film festivals worldwide!
